Side notes

September 25, 2017

Abstract

This file provides examples of side notes with eledmac. We use :

- \ledleftnote (left notes);
- \ledrightnote (right notes);
- \ledsidenote (configurable notes).

For the \ledsidenote, we put them in the outer margin. Notes are in small size, and italic. If there is more than one note by the line, they are separated|. The notes start at the level of the line they are called, and continue after.
